CALIFORNIA SPECIAL EDUCATION MANAGEMENT INFORMATION SYSTEM (CASEMIS)

Technical Assistance Guide
2008-09 DRAFT

California Department of Education **Special Education Division**

PREFACE

This guide is developed for special education local plan areas (SELPA), school districts, county offices of education, and state-operated programs (SOP) for the disabled that submit student level data via California Special Education Management Information System (CASEMIS). The complete package includes:

- CASEMIS software,
- Technical Assistance Guide (TAG),
- CASEMIS Step by Step

All three are available at the Department's Web site for downloading at:

http://www.cde.ca.gov/sp/se/ds/ .

These products can be downloaded to a Personal Computer (PC) if you are an **authorized user** (e.g. SELPA, district, county office of education, or SOP) of the system. Additional copies of the software or documentation can be made for the districts or sites under your jurisdiction. Any unauthorized copy, distribution, or commercial use of the software is strictly prohibited.

The Technical Assistance Guide (TAG) contains necessary and relevant information about the CASEMIS data fields and structure for the collection cycles. The software and the TAG are generally updated once a year reflecting all new reporting requirements from state and federal agencies. However, mid-year revisions are provided to users as needed. The Step by Step document is modified as the software updates are made.

All features in CASEMIS have been tested with fictitious and actual data. However, it is virtually impossible to recreate every situation that may be reported. If the system fails to perform as expected, please let us know by e-mail at casemis@cde.ca.gov.

Additionally, we believe that the system should be beneficial for both the California Department of Education (CDE) and the various education agencies that use it. If you have any suggestions for improving the software or the Technical Assistance Guide, please let us know by sending an e-mail with specific details to casemis@cde.ca.gov. We hope you will find these products useful.

Chapter I

General Information

California Special Education Management Information System (CASEMIS) is an information reporting and retrieval system in special education, developed by the California Department of Education (CDE), Special Education Division. The system has been designed to assist local education agencies (LEAs), special education local plan areas (SELPAs), county offices of education, school districts, and state-operated programs for the disabled (SOP) submit student level data to the CDE. The system has been in operation since 1987-88 on a voluntary basis, and by 1994-95, all SELPAs and SOPs in California have implemented the system. The CASEMIS has completely replaced all special education enrollment data collections using paper forms.

Background

The CDE and the SELPAs established several needs for a statewide student level database in special education. A detailed analysis of these needs and a discussion of the benefits and costs of implementing such a system were documented in a feasibility study prepared by the CDE and approved by the Department of Finance in 1989 for statewide implementation.

Past experience showed aggregate data lacked the degree of detail necessary to answer various program questions. Each time a need arose for new information that was not available in the existing pool of aggregate data, the CDE sent paper forms to LEAs to collect the needed data. These data were fragmented and often inconsistent; therefore, it was difficult for the Department to make any meaningful analysis of the data over a period of time.

The need for program information has continued to increase considerably in recent years. This trend shows no signs of slowing, as many emerging issues in special education require data on a large number of program variables and student characteristics that make reporting quite complex.

The changes in the data requirements and increasing sophistication in their use have made the traditional data collection process expensive, inefficient, and impractical. Therefore, the CDE launched this effort to collect primary data (as opposed to secondary, derived, or calculated data) at the student level, rather than aggregate data at the district or SELPA level. This approach enabled the Department to address many program questions using the existing pool of data without sending out paper forms to the LEAs. By implementing the system over a number of SELPAs since 1987, we found that the student level data reporting system is as error-free as possible, cost-effective, and efficient in meeting our information needs.

Purpose of the System

The purpose of the system is to develop the capability in the CDE and among the LEAs to collect and share accurate and reliable student-level data in a timely manner. The system provides the LEAs a statewide standard for maintaining a common core of special education data at the local level. Furthermore, at regular intervals it provides the CDE quality data that can be used for meeting many of our data needs. Specifically, they are:

1. To monitor special education programs in California on a continuous basis and to identify any unusual phenomenon or changes in the program.
2. To seek answers to various program questions by analyzing student level data for better planning, policymaking, and administration of special education programs.
3. To identify and research various program issues using the demographic and program variables.
4. To evaluate special education programs against statewide regular education goals in general and special education goals in particular.
5. To evaluate the effectiveness of special education programs in California with respect to individual student progress, movement to less restrictive environment, and transition to independent living.
6. To meet statutory and programmatic needs for data in special education.
7. To project future needs of students with disabilities in California and help develop strategies to address them.
8. To develop the capability to share special education information between the CDE and other state and local education agencies using the latest technologies.
9. To develop special education data standards in California and collect a set of common core data in special education so we can address issues of statewide and local interest.
10. To disseminate district-level, SELPA-level, and state-level information in special education programs.

Authority for Collecting Student Level Data

Both California state and federal laws have given the statutory authority to the CDE for collecting necessary data in special education on a regular basis. These requirements are stated in the appropriate code sections of the laws and regulations in order for the Department to effectively administer special education programs.

State Law

California *Education Code* (*EC*) Section (§) 56601(a) (Part 30) provides the statutory authority to the CDE to collect special education data, at least annually, in a form and manner determined by the Superintendent. It states that,

Each special education local plan area shall submit to the superintendent at least annually information, in a form and manner prescribed by the superintendent and developed in consultation with the special education local plan areas, in order for the superintendent to carry out the evaluation responsibilities.... This information shall include other statistical data, program information, and fiscal information that the superintendent may require. The superintendent shall use this information to answer questions from the Legislature and other state and federal agencies on program, policy, and fiscal issues of statewide interest.

The CDE, under this authority, has made the decision to collect student level data electronically, twice a year.

Several other sections of the *EC* and the *Government Code* (*GC*) authorize the department to collect data from the LEAs to meet various statistical, fiscal, demographic, and programmatic needs for data in special education in California. All relevant California code sections are presented in Appendix C.

Federal Law

Section 1418 of the Individuals with Disabilities Education Improvement Act (IDEA) 2004 of the federal statutes (Title 20 *U.S.C*. Chapter 33), requires that each state education agency (SEA) collect statistical and programmatic information on students enrolled in special education in order to apply for federal funds. Relevant sections of the *U.S. Code* outlining these requirements are shown in Appendix C.

General Overview of the System

The system requires each participating LEA manage a student level data system on a computer. The hardware can be personal computer, minicomputer, or mainframe, although the CDE's support for this system is limited to a microcomputer environment. The database can be developed according to the state database structure (see Chapter II) or the LEA may use its own structure. It is not necessary, nor is it expected, that the LEA have the same hardware or software as the CDE. In order to participate in the student level data system, however, some data interface between the CASEMIS and the LEA system is necessary.

The CDE provides a software, named CASEMIS (see Chapter III), to the LEAs annually or prior to each reporting cycle. The software, as an option, accesses the student data file maintained by the LEA and copies eligible records from this file to a new file for each reporting cycle. CASEMIS verifies the files and produces lists of errors and warnings for SELPAs to review. After SELPAs correct errors and verify warnings and examine the files for accuracy the LEA may submit the verified data files (new files created by CASEMIS) and the Certification Report.

Further details of the system are discussed in appropriate chapters in this document.

System Hardware for the LEA

As indicated above, the CASEMIS software supports only personal computers with Microsoft Windows 2000 operating system or later. This means that the LEAs maintaining their data system in computers other than personal computers must have the capability of downloading their student level data to the Windows 2000 environment.

System Software for the LEA

The LEAs may use any database management software to maintain their student data file. However, CASEMIS will read files written only in .**dbf** format. For your convenience, the tools in CASEMIS software can extract CASEMIS data files written in **.txt** or **.csv** (comma separated values) format into **.dbf** format. If your data files are in **.txt** or **.csv** format, CASEMIS may extract and verify the data files and then generate reports.

If the LEA cannot generate a data file in **.dbf, .txt, or .csv** format according to the CDE database structure, the LEA will not be able to use the CASEMIS. Please use the information below to contact SED.

Contact Information

The CDE provides free technical support to the LEAs as necessary. If you need assistance, have questions or inquiries for further information regarding the student level database or the CASEMIS software, please directed them to:

A Note About This Guide

This document has been written for use by public LEAs and the SOPs submitting data for students with disabilities in California. The LEAs include school districts, county offices of education, and SELPAs. The SOPs include all participating programs for the disabled, operated by various state agencies. The CASEMIS Technical Assistance Guide can be downloaded at

http://www.cde.ca.gov/sp/se/ds/

For the sake of convenience, we have used the terms LEA and SELPA to include the state-operated program. Similarly, we have used the term "district" to include the sites in a state-operated program. In some cases we have used both terms.

DATABASE STRUCTURE WITH FIELD DESCRIPTIONS AND CODES: 2008-09

The 2008-09 student level database has four data tables:

- Table A: CASEMIS Student Data,
- Table B: Student Services Data,
- Table C: Discipline (Suspension/Expulsion) Data,
- Table D: Post-secondary Follow-up.

A matrix provides structural and reference information concerning each table as a quick field reference. Specifics on each data field include the following information: (1) table and field number, (2) field name, (3) field type, (4) field length, (5) content verification, (6) new or revised status.

In-depth data field particulars are found in the Field Details section, which follows each table's matrix. Information in this section includes: (1) field definition, (2) purpose, (3) valid format, examples, codes, (4) comments (if any), and (5) methods of verification applied (if any).
Table Content Overview

Table A (Student Data Table) ***shall*** contain one record for each student found eligible for and received special education services. The unique identifier of a student record for a SELPA is derived by the combination of the *SELPA_CODE* and *STUDENT_ID* data fields in the table.

Table A *shall* also contain one record for each child referred and evaluated but not eligible for special education or related services.

Table A shall also contain one record for each child referred, found eligible, and did not receive special education and related services because parent declined services or child was parentally placed in private school where no ISP services were provided.

Table B (Student Services Data Table) ***shall*** contain **at least one record for each student** in Table A, except those students with a code 80 or 90 in Data Field A-32, PLAN_TYPE. Table B may contain more than one record, one for each service received by the student.

Table C (Discipline Data Table) ***shall*** contain **one record for each disciplinary action** for a student receiving services in Table A. Table C may contain more than one record for a student, if the student is subjected to more than one disciplinary action during the school year (for end-of-year reporting cycle only).

Table D (Post-secondary Follow-up) **shall** contain **one record for each student exited from program or SELPA during the prior year** except those students who returned to regular education (EXIT_RESON 70), transferred to another program (EXIT_RESON 76), or are deceased (EXIT_RESON 77) (2007-08, for end-of-year cycle reporting only). Post-secondary is generally considered as after high school;

the June 2009 Table D would include any student exiting high school during the 2007-08 school year or students 14 years of age and older.

It is important that each data table maintained by the LEA contains **all data fields** with appropriate codes according to this structure. Please note that in this document the term IEP (Individualized Education Program) includes IFSP (Individual Family Service Plan) and ISP (Individual Service Plan) as applicable. Generally, there are **no optional data fields (infant data as necessary)** in the CASEMIS data tables for students receiving special education and related services. **Certain fields may be left blank for students served under an ISP, please see Fig. 1. Fields A-1 through A-32 must be completed for students with PLAN TYPE codes 70, 80, and 90.**

Acceptable data sources for CASEMIS software are as follows:

- DBF file format **(.dbf),** providing the column headers conform to the CASEMIS structure,
- ASCII Text files, including: comma delimited (CD); comma separated values **(.csv)**

If a SELPA or district uses ASCII text **(.txt)** format, make sure that the date field is in CCYYMMDD format rather than MM/YY/DD format prior to converting a table from ASCII **(.txt)** or **.csv** to **.dbf** format.

Table A Field Detail

Report Identification

A-1 REPT_DATE Report Date	
Definition:	This is the reporting date of the student level data. This date is an implied certification that all data on the student record are accurate as of this date.
Purpose:	To identify and document the date of the student record, and to comply with the December and End-of-Year pupil count certification. This date is used for calculating age of a student for the December and End-of-Year student data reports.
Valid Format & Examples:	Date Field MM/DD/CCYY (DBF format) CCYYMMDD (ASCII format) 12/01/2008 December 1, 2008 Report 20090630 2008-09 End-of-Year Report
Comment:	This field is to identify the status of a student on a particular date, and to use it as a reference point in order to establish an historical profile of the student using several files over a period of time. If you use the CASEMIS system to copy records from a master file for any of the reports, you do not need to complete this field with data. The system will write the correct reporting date in this field as it copies qualifying records into a new file.
Verified:	This field is verified for the correct reporting date according to the reporting requirements (see examples above). If this field has a different date or is blank, the verification will result in an error message.

LEA Identification

A-2 SELPA_CODE SELPA or state-operated program (SOP) reporting data	
Definition:	This is the four-digit code to identify the SELPA or SOP that is responsible for providing services to the student and reporting data.
Purpose:	To identify the administrative unit under which a student receives special education and related services, and through which agency the funding for special education is allocated.
Valid Format & Examples:	CCCC (4-digit character code) 1700 Lake County 7200 California Department of Corrections and Rehabilitation – Division of Juvenile Justice
Comment:	These codes uniquely identify each SELPA/SOP and the corresponding administrative unit, following the statewide CDS coding system and the special education program and funding structure. This system provides sufficient flexibility to incorporate any future changes in the SELPA structure.
Verified:	If this field is left blank or if the entry in this field is not a valid SELPA code, it will result in an error.

A-3 SELPA_FROM SELPA from which student transferred	
Definition:	This is the four-digit code of the SELPA that placed the student to the reporting SELPA (Field A-2, SELPA_CODE), which is now providing (or has provided) services and is reporting data.
Purpose:	To identify the SELPA that places a student to the reporting SELPA for services.
Valid Format & Examples:	CCCC (4-digit character code) 3020 West Orange County 7200 California Department of Corrections and Rehabilitation – Division of Juvenile Justice
Comment:	• This field is for local use only. The CDE does not use this field. • This field shall be left blank for students in the state-operated programs (SOP). If this field is left blank or if the code is the same as the SELPA_CODE, it is assumed that the student is not placed by another SELPA. This field may be left blank if the student is not placed by (or transferred from) another SELPA.
Verified	An entry in this field must be a valid SELPA code, otherwise it will result in an error.

A-4 DIST_SERV District, county office or state-operated program site providing the majority of services and/or receiving funds	
Definition:	District, county office of education or state-operated program (SOP) site providing the majority of services to the student. This is a seven-digit code, of which the first two digits are the code of the county in which the district is located, followed by the five-digit district/site code. See *California Public School Directory* for correct code of the district or county office.
Purpose:	To identify the district or county office or SOP site that provides or accounts for the services and receives funding.
Valid Format, Examples, & Code Location	CCDDDDD (7-digit county-district code) Use the 7-digit county-district code or state-operated program code from the *California Public School Directory*. 4369393 Campbell Union Elementary 3033068 Fairview Developmental Center For valid codes visit the *California Public School Directory* located at http://www.cde.ca.gov/ds/si/ds/.
Comment:	Every year some districts change their administrative, organizational, or geographic configuration. Also, new districts are created to accommodate an increasing population. The Publications Office of the CDE documents these changes. Make sure that the code in this field is correct. Note: County schools office shall **not** be identified as "CC00000".
Verified	An entry in this field must be a valid district code; otherwise it will result in an error.

A-5 DIST_RESI District of Residence	
Definition:	This is the CDE issued seven-digit county-district-school (CDS) code of which the first two digits are the code of the county in which the district is located, followed by the five-digit district/site code. This may include: • The district where the student resides • The district where the parent lives • The district where the parent resides if the student is placed out-of-home district through IEP process • The district receiving student under inter-district transfer • The district or county office authorizing a charter school unless the charter school has a seven-digit district code • The district or county office, only for wards of the court if none of the above conditions applies.
Purpose:	To identify the district where the student resides in relation to the district that provides the services.
Valid Format:	See information under Field A-4, DIST_SERV.
Comment:	See comments under Field A-4, DIST_SERV.
Verified	• An entry in this field must be a valid district code, otherwise it will result in an error. • If this field is left blank or if the entry in this field is not a valid district code, it will result in an error.

A-6 SCH_CODE Seven-digit code of the physical location of the school where the student is enrolled	
Definition:	This is the seven-digit code of the school where the student is enrolled in or receives the majority of instructional services. For most students, this will be a regular public school; but for many others, this may be a nonpublic, private, parochial or other type of school. For a county-operated program located in a public school, this will be the seven-digit school code of the public school, not the seven-digit school code for all county-operated programs.
Purpose:	To identify the school and its location, where the student is enrolled and receives the majority of instructions; to be able to identify a student at the instructional site; to be able to aggregate program data at the school level.
Valid Format, Examples, & Code Location:	SSSSSSS (7- character code) Use the seven-digit school code from *California Public School Directory* or *California Private School Directory*. Note: If school code is not available, use the first seven characters of the name of the school. 6059315 Leonardo da Vinci Magnet School 4530077 Mountain Lakes High School See the *California Public School Directory* or *California Private School Directory* for correct school code at http://www.cde.ca.gov/ds/si/ds/.

A-6 SCH_CODE Seven-digit code of the physical location of the school where the student is enrolled	
Comment:	If school code is not available, use the first seven characters of the name of the school of attendance.
Verified:	If this field is left blank, it will result in an error

A-7 SCH_TYPE Type of school or program where student receives the majority of instructional services	
Definition:	This is the type of school or program where the student receives the majority of instructional services. For most students, this is the regular public school system, but for many others, this may be a different educational setting.
Purpose:	To identify the type of school where the student is enrolled.
Valid Format & Examples:	CC (2-digit character code) 10 Public day school 30 Juvenile court school
Comment:	This field should correspond to Field A-6 (SCH_CODE).
Verified:	• If this field is left blank, it will result in an error. • If the entry in this field is not a valid code, it will result in an error.

Chapter III

CASEMIS Software

The CASEMIS software has been developed by the CDE, SED, for assisting the SELPAs and the SOPs to submit student level data to the state. The CASEMIS program runs in the Microsoft Windows 2000 operating environment or later.

The software is revised at least once a year, coordinated with the updates to the student level database structure and the changes in the federal and state data reporting requirements. When necessary, the software is updated during the year. Any revision or upgrade of the software is made available to the SELPAs and SOPs about one month before the reporting cycle date. The software supports two major data reporting cycles: (1) the December pupil count and (2) the End-of-Year student data.

Versions of the CASEMIS Software

A new version of the CASEMIS software is released at the beginning of each school year (usually in the fall) to support all changes in the state and federal reporting requirements for that year, plus any new features that are added to the system over the past year. A specific version of the software is identified by the first three letters of the report cycle month, followed by the last two digits of the year, then a release letter. For example, the initial release of CASEMIS software for the 2008-09 school year is: CASEMISDec08a.

When a newer software version is released, the software will be identified by the last two digits of the year with a sequent release letter. For example, a second release of the December software during the 2008-09 school year will be identified as CASEMISDec08b. The software is available for downloading at the Department's Web site in the following location:

http://www.cde.ca.gov/sp/se/ds/

Additionally, the Web site provides instructions for installation of the software on a PC. The installation process provides guidance through the necessary steps, and will display a confirming message if the installation is successful.

System Features

The major features of the CASEMIS software are: (1) to extract student level data for various reporting cycles; (2) to verify data files and generate error, warning, and unextracted records reports; (3) to generate summary reports from various data tables; and (4) to generate the data Certification Report.

The **file extraction** component of the CASEMIS creates new files by copying records from source data files maintained by the LEA or SOP. This process requires that your source data files have the same data fields and codes as in the 2008-09 CASEMIS database structure. New files are generated to meet the appropriate criteria for various reporting requirements (see *Chapter IV*).

The **Verification** routine checks the data fields in the data files for any logical inconsistency and produces a report of errors, warnings, and unextracted records (if any). The ***errors must be corrected*** and the ***warnings must be verified*** prior to submitting data to the Department.

The **report generation** component prepares various reports by SELPA, by district, or by site within the SELPA, according to the format specified by the CDE. Additionally, the system generates summary reports by SELPA, and by districts,

When the data files are verified and determined to be error-free, the user may upload the data files to the CDE via the CASEMIS secured Web site available in the "Upload Data File" option. The user can generate a Certification Report using the existing data files on the computer and fax a signed copy to CDE.

In addition, the CASEMIS software offers a set of **Tools** that are helpful for editing the data files. The utilities contain the latest information on the SELPA and district configuration, file and manipulation options.

CASEMIS Step By Step

When launching the CASEMIS software, the opening screen displays the logo of the CDE. Follow the steps below to use the features of the software, or download the CASEMIS Step by Step. This detailed document is found online at:

http://www.cde.ca.gov/sp/se/ds/

The following diagram provides a general overview of the CASEMIS data or file Extraction Process. It displays the flow in which the CASEMIS is launched and describes the next steps taken when certain decisions or processes are executed. The detailed information is described in the CASEMIS Step By Step.

Chapter IV

Reporting Requirements

Each LEA and SOP implementing the student level database shall submit to the CDE a copy of their student data file in order to meet the two reporting requirements in 2008-09 school year: (1) the December 1, 2008 Report and (2) the 2008-09 End-of-Year Report. Details of these requirements are discussed in the following pages.

Criteria for Tables A, B, and C

Each agency submitting student level data to the CDE shall meet the following criteria for including a student in the data file.

1. The CASEMIS Student Data file shall contain one record per student in Table A; in order to ensure this, the student identification code shall be determined in such a way that no two students (or no two records) have the same identification code.
2. The Services Data Table and Discipline (Suspension/Expulsion) Data Table may have more than one record per student, as applicable. Post-secondary Data Table may have one record per student.
3. All students in the data file **must** be receiving (or have received) special education and related services according to an IEP (includes IFSP and ISP) and all applicable state and federal laws and regulations, or were referred, and evaluated for special education services.
4. All data for a student in the student level data file shall be based on the student's IEP or evaluation.
5. A student who is receiving (or has received) special education services in a state-operated program for the disabled, shall **not** be included in the student level data file submitted by an LEA (SELPA). The SOP shall report these students.
6. If a student is placed by a SELPA to another SELPA for providing special education services, the SELPA that provides the services to the student shall report the student; the SELPA that placed the student shall **not** report the student.
7. If more than one SELPA, county or district provides special education services to a pupil, the agency that provides the most intensive or majority of the services shall report the pupil.
8. A pupil placed in a nonpublic school or agency (NPS) shall be reported by the school district, county office or the SELPA that made the placement.
9. A disabled child who is receiving a related service may be reported **only** if that related service assists the child in benefiting from special education.
10. A disabled child receiving special education funded by the federal government may be reported **only** if additional local or state funds are available for nondisabled children of that age range.
11. Native American children on or near a reservation may be reported **only** if the SELPA provides special education services to these children.
12. Disabled children on military facilities may be reported **only** if the SELPA provides special education services to these children.
13. A child younger than three years with a disability whose services are funded through a contract or vendor agreement with a regional center of the Department of Developmental Services is not to be included in the CASEMIS report process.

The LEA and the SOP shall document the procedures for developing, maintaining, updating, and reporting the student level data file, and keep them at their office for on-site verification by the CDE.

Requirements for Specific Reports

Each SELPA and SOP shall submit a copy of the **verified** student level data files on-line containing data on all students who meet the criteria given in the following paragraphs for specific reporting requirements. SELPAs and SOPs shall follow all applicable laws, regulations, and the instructions for each report to determine eligibility for including a student in the data file.

December Reports

For the December Reporting Cycle, the files shall contain data on each student who is receiving (or has received) special education and/or related services according to an IEP on December 1, 2008. This determination will be based on the entry in the data fields ENTRY_DATE and EXIT_DATE for each student record. The ENTRY_DATE must be on or before December 1, 2008. The EXIT_DATE shall be blank or may **not** be before December 1, 2008. A student may not be older than 22 years old as of December 1, 2008.

End-Of-Year Reports

For the 2008-09 End-of-Year Reporting Cycle, the files shall contain data on **students who have received special education and/or related services for any period of time between July 1, 2008 through June 30, 2009**. This means that the files shall include students who have entered and/or exited **as well as those who have continued through the program during the reporting period**. The determination of this criterion will be based on the data in the fields ENTRY_DATE and EXIT_DATE. All students shall be included in the files except those whose EXIT_DATE is before July 1, 2008 or ENTRY_DATE is after June 30, 2009. This also includes those students referred for special education, evaluated but did not receive special education.

Although the End-of-Year data file will contain records of students who are active as well as have exited, all exit reports are generated based on exited students only.

Reporting Cycles and Data Tables

The SELPA shall submit the completed data tables for each reporting cycle according to the following schedule and specifications:

	December	**End-of-Year**
Table A, CASEMIS Student Data	Yes	Yes**
Table B, Services Data Table	Yes	Yes**
Table C, Discipline Data Table	No	Yes**
Table D, Post-Secondary Follow Up from 2006-07	No	Yes
Reporting Date/Period	12/01/2008	7/1/2008 - 6/30/2009
Record Characteristics	As of 12/01/2008	Cumulative**

** The files are cumulative for the 2008-09 school year.

Anomalies Reports

The U.S. Department of Education, Office of Special Education Programs (OSEP) and the Office of the Inspector General (OIG) require that states provide explanations of data anomalies by category, if changes are significant. In the CDE effort to provide accurate and quality data and timely response to the OSEP and OIG, CASEMIS software automatically generates reports showing year-to-year comparison of data for districts and SELPAs as a part of the verification process. These reports are designed to assist SELPA directors and staff in identifying potential data anomalies from last year to the current year before sending the data to the CDE. Potential data discrepancies or anomalies are encircled on these reports. The SELPAs shall review these reports prior to sending SELPA data files to the CDE and provide an explanation regarding any encircled data element. In order for SELPAs to be compliant, these explanations must be received by the Department along with the data files and signed certification page.

Reporting Deadlines

The deadlines for submitting student data files to the CDE are close of business (5:00p.m.):

Reporting Cycle	Deadline
December 1, 2008 Cycle	January 02, 2009
Personnel Data	March 6, 2009
2007-08 End-of-Year Cycle	August 14, 2009

Note that all dates are **receiving dates** (by close of business – 5:00 p.m.) by the CDE -- **not mailing dates**.

Sending File to State

We encourage you to send your student data file via the Internet by the reporting deadline. Send your file to the CDE using the secure Web site available using the CASEMIS software.

You **must** fax (916-327-3730) or mail the file certification page generated by the system, in order to make your file submission official.

If you are unable to send your data file via Internet, you may send your file on a diskette or CD-ROM. Make sure that the diskette has appropriate label to identify your SELPA or SOP and the reporting cycle. If your data file requires more than one diskette, identify each diskette in proper sequence. You are responsible for the proper protection of encryption data sent by any other method than the CDE secure Web site.

Revision of Data

In the past the Department allowed SELPAs a two-week period to revise their original data submission. Due to the new reporting requirements under IDEA the CDE is no longer able to provide a data revision. Districts and SELPAs should review their data thoroughly prior to submission.

Removing Duplicate Students from File – December Report

In order to eliminate reporting the same student by more than one SELPA, the Department will verify the statewide student data file after the submission deadline (December Reporting Cycle only). The verification will be conducted by comparing selected demographic data fields (LAST_NAME, FIRST_NAME, BIRTHDATE, and GENDER) for all students. Reports listing matching students will be sent to the SELPAs involved to examine their file for possible duplication and correction.

It is extremely important that **all SELPAs submit their file containing all students by the initial deadline** so the department can verify the file for possible duplicate students. An *unduplicated count is a mandate* under the Individuals with Disabilities Education Act (IDEA). If a single SELPA fails to submit its complete file by the deadline, the department's effort to eliminate duplicate students from the statewide file would be incomplete. In addition, it delays the other SELPAs, who met the time line, from declaring their files as final.

In order to streamline the process of unduplication, the Department will follow the steps listed below:

Step 1: Following the file submission reporting deadlines, the Department will verify the statewide student data file for possible duplicate report of students. This will be done even if the statewide file does not have data from all SELPAs (see Step 5 below).

Step 2: A cover letter and report access instructions will be sent by CDE to each SELPA director involved.

Step 3: SELPAs shall verify the reports showing possible duplicates against their data file and remove students as appropriate. SELPAs will submit a new unduplicated data file to the department **within one week** or as otherwise directed. SELPAS submitting potential duplicate students during this step must provide documentation describing the methods used for determining the student should be included in their data file. NOTE: **NO new student records may be added during this process.**

Step 4: After the one-week window period the Department will again verify the statewide student data file for duplicates student records from all revised files from Step 3. The Department will determine the disposition of any remaining potential duplicate student records as described in Step 5.

Step 5: If the verification in Step 4 shows a duplicate student between a SELPA that had failed to submit a revision or meet the initial timeline and another SELPA that did meet all timelines, the Department may exercise its authority to unduplicate the file by removing that student from the SELPA that failed to submit a revision or failed to meet the initial timeline. If two or more SELPAs resubmit duplicate student records without documentation that they are different students, the Department will remove the students from all SELPAs.

The statewide student data file will then be finalized and a report showing the status and count for all SELPAs will be released. The reporting cycle will then be closed.

Certification of Data

A properly signed **Certification Report page must** accompany the data files, new or revised, in order to comply with the reporting requirements. You **must** generate the Certification Report from the CASEMIS system. An authorized official of the SELPA or SOP must sign the Certification Report before sending it to the Department. You may fax the signed Certification Report to 916-327-3730.

Remember**, the data files are not official unless the SELPA/SOP director or an authorized official of the agency certifies it**.

Defaulting on File Submission

If a SELPA or SOP fails to submit data for a reporting cycle by the deadline or fails to meet all the requirements, the CDE may exercise one or more of the following options to complete the reporting cycle.

- The Department will notify the district or county superintendent(s) of the SELPA about the noncompliance; and
- The Department will initiate a process to sanction the salary of the district superintendent(s) for non-compliance with the federal reporting requirements.

Note that any of the above actions may result in noncompliance as well as adverse fiscal effect to the SELPA.

Report Checklist

Before you send your data files to the CDE, new or revised, please make sure that the transmittal package contains the following:

- Student Data Table;
- Services Data Table;
- Discipline Data Table, if any (for the End-of-Year Cycle);
- Post-secondary Follow-up From 2007-08 Data Table, if any (for the End-of-Year Cycle);
- File Certification Report generated by CASEMIS completed and signed by reporting cycle due date.
- Anomaly explanation(s) due by reporting cycle due date.

Your submission of data files is not official without the Anomaly Explanation (s) and the Certification Report properly signed.

Address of Delivery

Data reports and accompanying materials shall be submitted by the SELPAs (not by the districts) and SOPs to CDE as follows:

Mailing Address:	California Department of Education Special Education Division 1430 N Street, Suite 2401 Sacramento, CA 95814 Attn: Assessment, Evaluation, and Support Unit
Telephone:	(916) 327-3651

Fax:	(916) 327-3730

If you would like to know whether the department has received your data files after you have mailed it or sent via the Internet, please watch our periodic update during the window period of each reporting cycle on the Internet. We will not be able to send any individual reply in response to your request. As soon as we receive your files, we will include your agency in the next update.

All questions regarding the student database shall be directed to the Special Education Division.

(Pub. L. 91-230, title VI, Sec. 601, as added Pub. L. 108-446, title I, Sec. 101, Dec. 3, 2004, 118 Stat. 2647.)

Section 1401. Definitions.

(2) Special rule for use of fiscal year 1999 amount

If a State received any funds under this section for fiscal year 1999 on the basis of children aged 3 through 5, but does not make a free appropriate public education available to all children with disabilities aged 3 through 5 in the State in any subsequent fiscal year, the Secretary shall compute the State's amount for fiscal year 1999, solely for the purpose of calculating the State's allocation in that subsequent year under paragraph (3) or (4), by subtracting the amount allocated to the State for fiscal year 1999 on the basis of those children.

(3) Increase in funds

If the amount available for allocations to States under paragraph (1) for a fiscal year is equal to or greater than the amount allocated to the States under this paragraph for the preceding fiscal year, those allocations shall be calculated as follows:

Except as provided in subparagraph (B), the Secretary shall allocate for the fiscal year--

(III) 15 percent of those remaining funds to States on the basis of the States' relative populations of children described in subclause (II) who are living in poverty.

(16) Participation in assessments

(A) In general
